

CLEMENTDESIGN

CLEMENT DESIGN is a French company, a family story born in 1996 in the small room in the basement of an enthusiastic couple who created this company together: Mr and Mrs Bouville. At that time, professional clothing was the poor relation of textiles and kitchen clothing was the poor relation of professional clothing. With his experience in workwear, M Bouville revolutionized this sector by bringing elegance and comfort to the professional outfits of all these catering trades, all those lovers of Gastronomy who work tirelessly, intensely without counting their time

Over the years, CLEMENT DESIGN has made the difference with its innovations, their stylists and the R&D department are always looking for the best materials, work hard and with passion for creating modern cuts to meet the requirements of daily use and intensive washing.
